GreyNet Award Recipient 2025

This year marks the sixth time in three decades that the GreyNet Annual Award is bestowed on two information professionals in the field of grey literature

Brian Paul Bales is currently the Coordinator of the International Nuclear Information System (INIS) at the International Atomic Energy Agency (IAEA) in Vienna, Austria. In this role, he leads one of the world's most comprehensive repositories of literature on the peaceful uses of nuclear science and technology, ensuring access to grey and conventional literature across 132 INIS Member States and the world. Brian's involvement with GreyNet International over the past five years as a conference delegate, author, and Associate member on behalf of INIS-IAEA has made a significant contribution to our organization's work in the field of grey literature. GreyNet's Open Data Project 2025-2026

Over the past thirty years, GreyNet International has initiated multiple projects dealing with grey literature. Some have advanced to sustained information resources, while others have been discontinued. Since the content of the latter still remains within GreyNet's inhouse archive, the Open Data Project would further secure their FAIR use. For this reason, GreyNet strives to make all of its twenty plus information resources openly accessible for purposes of referencing, citation, and reuse. Some of these resources will entail DOI minting or the assignment of other identifiers, the addition of metadata, and the designation of URLS and/or landing pages. Past and present associate members and collaborative partners are invited to incorporate - in whole or in part - these resources in their own information systems. Below is an overview of these grey literature resources. For further details contact: **info@greynet.org**

Grey Literature Document Types	
01. Biographical Notes (BIO)	12. Newsletters
02. Conference Papers (GLP)	13. Memoranda
03. Datasets	14. GreyForum Workshops
04. Video Presentations	15. Program Books
05. TGJ Journal Issues	16. Business Reports
06. OpenGrey Database	17. Resources in Grey Literature (RGL)
07. Conference Proceedings	18. IDGL Directory
08. Data Papers	19. PUBGREY Registry
09. Conference Abstracts (GLA)	20. Newsline Serial
10. Conference Slides	21. Advertorials
11. Conference Posters	22. GreyWorks Seminars

GreyNet is an ICSTI Partner Organization

The International Council for Scientific and Technical Information (ICSTI) invites members and STI colleagues to the 2025 Annual Conference, **Bridging Open Science Ethics and Infrastructure**. This conference will be consecutive to the CERN Open Science Fair in Geneva. The two-day event will be held at ETH Zurich on September 18th and 19th, and will include a member General Assembly, business meeting, and a day of workshops free and open to all. Workshops will explore the evolving considerations and technical framework necessary for sustainable, ethical, and efficient knowledge-sharing systems. **https://www.icsti.org**
